ADAPTIVE RIDING PROGRAM

Riders participate in adaptive riding lessons that provide benefits in accordance with the individual's goals. Lessons are tailored to provide optimum experiences for each student. All instructors are PATH certified and use a variety of teaching methods to enhance participants' horsemanship skills as well as physical strength and cognitive abilities. Each lesson is assisted by a trained volunteer team, which lead the horse and walk alongside the participant to help stabilize and support as needed.

SUMMER PROGRAM

Equicenter summer program combines educational Horticulture and Equine active learning opportunities with themes to make each week unique and exciting. Students will have hands-on horse time, nature based learning activities and horticulture experiences during the week while spending time in a group setting and working on social emotional learning. Sensory areas for regulation and the ability to flex activities within our new classroom space make this unique program a great way to gain horse knowledge and experience the outdoors this summer. While our summer program works to build education and hands-on experiences we also tailor the experience for each individual.
